1. WAP in Python to create a set.

2. WAP in Python to iteration over sets.

3. WAP in Python to add member(s) in a set.

4. WAP in Python to remove item(s) from a given set.

5. WAP in Python to remove an item from a set if it is present in the set.

6. WAP in Python to create an intersection of sets.

7. WAP in Python to create a union of sets.

8. WAP in Python to create set difference.

9. WAP in Python to create a symmetric difference.

10. WAP in Python to check if a set is a subset of another set.

11. WAP in Python to remove the intersection of a 2nd set from the 1st set.

12. WAP in Python to remove all elements from a given set.

13. WAP in Python to find the elements in a given set that are not in another set.

14. WAP in Python to find maximum and the minimum value in a set.

15. WAP in Python to find the length of a set.

16. WAP in Python to check if a given value is present in a set or not.

17. WAP in Python to check if two given sets have no elements in common.

18. WAP in Python to check if a given set is superset of itself and superset of another given set.
